-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 14 September 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Receipt is acknowledged of the amendment and request for continued examination filed 09/14/2006.

The rejections under Edgren et al, Theeuwes et al, and Faour are withdrawn in view of applicant's remarks.

The following rejections however are made in view of applicant's amended claims:

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-17 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Applicant's claims have been amended to overcome the art by specifying that the coating is present until exposed to bodily fluids. However, This is only the case when a second layer has been laid on top of the first (see page 10, lines 1-20). The embodiment set out in claims 1-14, 16 and 17 is not supported by the original specification, without this second layer. At page 9, lines 5-32, the embodiment claimed has an incision made in the coating via laser beam prior to implantation or exposure to bodily fluids. The drug release occurs through these incisions. Therefore, applicant's specification does not support the embodiment as claimed since the laser incision is made on the coating itself. Further, the only embodiment which has the complete coating must have the second coating, which serves as an enteric drug delivery coating. Therefore, while applicant has amended around the references, the embodiment as set out in the claims is not supported by the original specification. Indeed, without the amendments, the references would fully read on these claims.

The addition of the limitation of the coating being present before contact with aqueous fluids, and removed subsequent to this is therefore considered new matter, since the first embodiment as originally claimed and set out at page 9 of the specification does not have this second coating. The second coating as set out at page 10, and claim 15 is only supported by the second embodiment.

Art Unit: 1615

Applicant is requested to clarify which embodiment is being claimed as only the second coating embodiment is supported by the specification to have the properties as set out in claim 1.

EP 0 294 993 and EP 631 775 A1 appear to also read on the invention as originally claimed and as set out at page 9 of the specification, and are cited of interest.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Carlos A. Azpuru whose telephone number is (571) 272-0588. The examiner can normally be reached on Tu-Fri, 6:30 am - 5:00 pm.
